

# Environmental Policy

Capital Coated Steel is committed to protecting the local, regional and global environment by the continual improvement in environmental performance and prevention of pollution through the Environmental Management System ISO 14001:2015.

As a service centre for pre-coated steel, the company's processes impact on the environment primarily through the use of energy and resources. There is no discharge to either air or water and very little use of hazardous materials.

As a company top management are committed to;

- Educating and training employees to carry out tasks in an environmentally responsible manner.
- Setting objectives and targets to continually improve its environmental performance.
- Measuring performance with periodic review of targets and objectives in order to ensure continual improvement, based on our significant environmental aspects, compliance obligations, environmental risks and opportunities.
- Minimising waste and where possible reuse or recycle material and dispose of waste through safe and responsible methods in accordance with relevant regulated guidelines.
- Establishing partnerships with suppliers and interested parties, addressing issues, needs and expectations to provide an improved environment.
- Auditing and inspecting operations to monitor the effectiveness of the EMS.
- Fulfilling our compliance obligations within legislation and other requirements.
- Ensuring that the risks and opportunities that can affect the environment are determined and addressed and the focus on enhancing the environment is maintained.

Our EMS is externally audited by BSI and has been certified as meeting the requirements of BS EN ISO 14001:2004. *Cert EMS522663* and we are currently working towards obtaining BS EN ISO 14001:2015. This policy will be communicated to all staff and available to interested parties.

Date: 26.07.2017

G.J.Hunt
